

MUHAMMED AJNAS VP

UI/UX DESIGNER

Kozhikode, Kerala, India | Phone: +91 9544534351 | ajnasvkn@gmail.com | <https://ajnasvkn-boop.github.io/portfolio>

PROFESSIONAL SUMMARY

I'm Muhammed Ajnas, a UI/UX Designer passionate about creating simple, meaningful, and user-friendly digital experiences. I enjoy transforming ideas and problems into intuitive interfaces through research, wireframing, visual design, and prototyping. With a background in Sociology, I have a strong interest in understanding people and their behavior, which helps me approach design from a user-focused perspective.

PROJECT EXPERIENCE

NexClient - Client Management Application

UI/UX Design

NexClient is a mobile application designed to help freelancers efficiently manage clients, projects, tasks, invoices, payments, and important business documents in one place. Instead of switching between multiple apps for communication, task management, and billing, freelancers can streamline their entire workflow through a single, intuitive platform.

The app aims to improve productivity, reduce administrative work, and help freelancers focus more on delivering quality work while maintaining strong client relationships.

RANK - Responsive Business Landing Page

UI/UX Design

Designed and developed a modern, responsive landing page for RANK (West India Plastic Trading Company) using Figma, HTML, CSS, and JavaScript. Focused on clean UI, mobile-friendly layout, product showcase, branch information, testimonials, and customer engagement.

Servix - Service Booking App

UI/UX Design

Designed a user-friendly mobile app that allows users to discover and book local service providers such as painters, welders, plumbers, mechanics, and cleaners. Created the user flow, wireframes, and UI screens in Figma with a focus on simple and convenient booking.

EDUCATION

UNIVERSITY OF CALICUT - Calicut

Bachelor in Sociology

- Built a strong understanding of human behavior, research methods, and social interaction.
- Developed analytical, communication, and problem-solving skills through academic projects and field studies.
- Applied a user-centered perspective that supports UX research and design thinking.

SMEC TECHNOLOGIES - Kaloor, Kochi

UI/UX Design

- Learned the fundamentals of User Interface (UI) and User Experience (UX) design.
- Gained hands-on experience in wireframing, prototyping, and creating responsive interfaces using Figma.
- Designed landing pages, mobile app interfaces, and portfolio projects with a user-centered design approach.
